A New Moon in a House in your chart represents a potential new start in that area of your life. A Full Moon represents a high tide or fullness in the affairs of the pair of Houses it triggers in your chart.

The high energy of an eclipse in a House in your chart demands attention for several months, especially if on or near your birthday because you will re-evaluate your purpose and direction. >The eclipses are Metonic, i.e. exact repeats of 2006 in the same months. Check back to see how events & plans in 2025 are an extension of that time.
